

Dr Phil Moore B.Sc., D.Clin.Psych., Dip. Clin. Neuropsychology.
Consultant Clinical Psychologist and Neuropsychologist

Health Professions Council Registration: **PYL250**

Dr Moore brings over 15 years of NHS experience. He is currently appointed Consultant Clinical Neuropsychologist on the TOMM40 multinational controlled trial of a treatment for cognitive impairment. He is also Principal Clinical Psychologist heading North Devon's stroke and acquired brain injury psychology service and Clinical Psychologist for the Community Neuropsychology Neurorehabilitation service in Exeter. He is also an honorary lecturer on the clinical psychology doctoral programme for the University of Plymouth. He runs a busy private practice specialising in neuropsychological assessments for the civil and criminal courts.

CIVIL LAW EXPERTISE

- Dr Moore regularly provides clinical psychological and neuropsychological assessments for the civil courts.
- He specialises in cognitive performance following neurological events (including brain injury, stroke, neurological illness, dementia).
- He assesses cognitive and mental capacity for the court of protection best interest decisions.
- He reports on fitness to practice decisions following acquired brain injury.
- He assesses entitlement to pension through psychological or neurological ill-health.
- He reports on the psychological injury following an accident (impact & prognosis of brain injury/ psychological sequelae/trauma).

CRIMINAL LAW EXPERTISE

- Dr Moore regularly presents both written and oral evidence to the Criminal Courts on issues including risk of re-offending, disposal, therapeutic intervention and witness testimony.
- He offers assessments of adults and children 8 years and above.
- He specialises in assessing the mental capacity and witness testimony of individuals with learning difficulties.
- He is skilled in the assessment of forensic risk including violence and sexual violence towards adults.
- Mental health and mental capacity for defendants in criminal cases (brain injury, stroke, learning disabilities, autism and mental illness).

THERAPEUTIC EXPERTISE

- He offers neuropsychological and cognitive rehabilitation for acquired brain injury.
